## Euro 003 - Battery Powered PSTN Communication Module

The EURO 003 battery powered modem has been specifically developed for remote communication with Technolog data logging and pressure control products over a public switched telephone network.

- Virtually maintenance free
- Typical Battery Life >3 Years (depending on mode of use)
- Compatible with Technolog's communication and configuration software for PCs

# Technical Specifications

- Modem** ..... Communication speed: 1200bps/2400bps transmit and receive  
Line requirement: PSTN  
Compatibility: CCITT V25 bis, V22  
Dialing method: Tone (DTMF) or pulse dialing (loop disconnect)  
Automatic answer: CCITT V25  
Approval: Complies with EU Directives R&TTE 1999/5/EC (TBR21), EMC 89,336/EEC, LVD 73/23/EEC  
Modem power: Internal battery pack >3 years life based on typical usage of 2 mins / day
- Dimensions** ..... Length: 210 mm  
Width: 120 mm  
Height: 70 mm
- Environmental** ..... Protection classification IP65
- Weight** ..... 0.75 kg
